

5. Rotation Count in a Rotated Sorted Array

IP:	<table border="1"> <tr> <td>0</td><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td> </tr> <tr> <td>15</td><td>18</td><td>2</td><td>3</td><td>6</td><td>12</td> </tr> </table>	0	1	2	3	4	5	15	18	2	3	6	12
0	1	2	3	4	5								
15	18	2	3	6	12								

Op: 2

↓
find number of times the array was right-rotated from its originally sorted form.

arr[]:	<table border="1"> <tr> <td>0</td><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td> </tr> <tr> <td>15</td><td>18</td><td>2</td><td>3</td><td>6</td><td>12</td> </tr> </table>	0	1	2	3	4	5	15	18	2	3	6	12
0	1	2	3	4	5								
15	18	2	3	6	12								

↓
Note: array has distinct integers

sorted[]:	<table border="1"> <tr> <td>0</td><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td> </tr> <tr> <td>2</td><td>3</td><td>6</td><td>12</td><td>15</td><td>16</td> </tr> </table>	0	1	2	3	4	5	2	3	6	12	15	16
0	1	2	3	4	5								
2	3	6	12	15	16								

0	1	2	3	4	5	6	7
15	18	2	3	6	8	11	12

$$[a[mid-1] < a[mid] < a[mid+1]]$$

0	1	2	3	4	5	6	7
6	8	11	12	15	18	2	3

$$[a[mid-1] < a[mid] < a[mid+1]]$$

↓
only this cond' can't decide where to go next

↳ look for the value $a[0]$

$$a[0] > a[mid]$$

↓
Go left

0	1	2	3	4	5	6	7
15	18	2	3	6	8	11	12

$$[a[mid-1] < a[mid] > a[mid+1]]$$

$$[\text{ans} = \text{mid} + 1]$$

$$a[0] < a[mid]$$

↓
Go Right

0	1	2	3	4	5	6	7
6	8	11	12	15	18	2	3

$$[a[mid-1] < a[mid] > a[mid+1]]$$

$$[\text{ans} = \text{mid} + 1]$$

edge case

0	1	2	3	4	5
11	2	3	4	5	6

$$\text{mid} = 0 \Rightarrow a[0] < a[1] \Rightarrow \text{ans} = 0$$

0	1	2	3	4	5
6	7	10	11	13	15

$$\text{mid} = n-1 \Rightarrow$$

$$a[n-1] < a[0] \Rightarrow \text{ans} = 0$$

$$a[n-1] > a[0] \Rightarrow \text{ans} = n-1$$

0	1	2	3
32	18	21	30

$$a[mid-1] > a[mid] < a[mid+1] \Rightarrow \text{ans} = \text{mid}$$
